

PRESCRIPTION DRUG CARD

We are pleased to be able to deliver a *discount* card that we have arranged for you through RESTAT, the ninth largest Pharmacy Benefit Manager (PBM) nationally. The card is designed for use with or without insurance. In addition to discounts for prescription drugs, the card offers discounts for prescription eye glasses, teeth whitening, diabetic supplies, LASIK surgery and hearing aids.

Here is how to use the card for prescription drug discounts:

- The discount card has “Lowest Price Logic” to assure that you get the best pricing on prescriptions. You should always present your insurance card and the discount card so the pharmacy can extend the lowest price.
- If you have a plan with copays for prescription drugs the discount card will not lower them.
- If you have a high deductible health plan it is possible that, if the discount card price is lower, it will be applied to your deductible. It depends on your pharmacy. If it is not, send in the receipt with a claim form to your insurance company.

- You can use this discount card for drugs that are not covered by your insurance plan. This includes drugs that your doctor might give you when you are traveling abroad such as antibiotics “just in case”, anti-malarial, etc. It also includes drugs that are considered cosmetic such as certain dermatologic creams prescribed if you are over a specific age, lifestyle drugs such as Viagra, mouthwash prescribed by a Dentist – to name a few. If your pet has to take a medication that you get from a pharmacy, you can use the card for that too.

- The information on the card includes a Customer Service number and a Pharmacy Helpline.
