What is Rx Savings Solutions?

Are you spending hundreds, even thousands of dollars a month on prescription medications? Our team of expert pharmacists knows exactly what you and your family are up against and we're here to help. We don't work for any pharmaceutical or insurance companies, we are only concerned with saving you money. Even if no generic versions of your medications are available, we can still find ways to save you money, guaranteed.

How do I begin saving?

Simply go to www.rxsavings-singernelson.com, then enter your assigned company code. You'll be redirected to the "Sign Up Process" where you list your current medication information — prescription name; drug strength; quantity; directions; and the price you currently pay. You can get a printout from your pharmacy. A price report will be emailed to you within 48 hours.

Rx Savings Solutions
Prescription Consulting Services. *Guaranteed to Save You Money.*

You save with support

Would you like to save up to 60% off your medication costs each month like our average clients?

You save out-of-pocket with each prescription filled. Finally, there is a professional service focused on saving the consumer money while promoting a healthier life. Our Price Report (below) documents what you can do to realize savings, how to carry out these procedures, and the amount of expected savings if you do so. **This is an empowering tool, which helps you take control!**

FREQUENTLY ASKED QUESTIONS

Who is Rx Savings designed for?

Everyone who has acute or maintenance medications, including those people with private insurance, Medicare, Medicare part D, and cash paying customers.

If I have a co-pay through my insurance or Medicare Part-D, wouldn't that be cheaper than paying a cash price?

Not necessarily. In fact, often times we are able to find cheaper "cash" prices, or suggest alternative medications used to achieve the same result that can save our patients significant amounts of money. In some cases, forgoing an individual's insurance or Medicare plan all together ends up being a better deal for the patient and can save hundreds of dollars a year on just one medication.
